DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23 and 27-35, drawn to methods of producing or encoding a depth map for the use in the conversion of 2D images into stereoscopic images, classified in class 382, subclass 154.
 - II. Claims 24-26, drawn to a method of producing a depth map for use in the conversion of 2D images in a video sequence into stereoscopic images, classified in class 375, subclass 240.01.
 - III. Claims 36-38, drawn to methods of transmitting 2D images and depth map data for viewing on a stereoscopic viewing system, classified in class 348, subclass 43.
 - IV. Claims 39-42, drawn to methods and a decoder for decoding depth map data, classified in class 382, subclass 232.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as dividing video sequences into partial sequences to be transmitted to operators to produce stereoscopic images. Invention III has separate utility such as transmitting stereoscopic images for viewing on a stereoscopic viewing system. Invention IV has separate utility such as decoding stereoscopic image data for viewing on a stereoscopic viewing system. See MPEP § 806.05(d).

Art Unit: 2623

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even if the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan J Hesseltine whose telephone number is 703-306-4069. The examiner can normally be reached on Monday - Friday, 8 AM - 4:30 PM.
